

A cost-effective protection solution.

Iverify can design a program to guard against break-ins, vandalism and burglary.

Our monitoring center receives an immediate signal from zone intrusion alarms when activated. We respond accordingly based on each customer's protocols, protecting your property and inventory from further damage.

From The "I", our teams of experienced security professionals can visually inspect and verify premises, assets, inventory, doors, safes, parking lots, equipment, ATMs and cash registers. They can monitor possible intruders, employee and customer activity, assure compliance, and respond with real-time audio.

Additional Iverify Services:

- Video Verification
- Interactive Video Response
- Fire Protection
- CCTV Systems
- Business Intelligence
